

# CONTEXT™ Chatbot Output Guide

This guide explains how to read and use the outputs from the CONTEXT Prompt Refinement Coach chatbot.

## 1. Read in Order

The chatbot output always flows in the same sequence: Original → Gaps → Refined → Template → Rubric → Mapping → Artifacts → Variants → Next Steps.

## 2. Refined Prompt (Copy This)

The **\*\*Refined Prompt\*\*** section is the most important part. It contains your improved, ready-to-use prompt. Always copy EVERYTHING under this heading if you want to run the refined version of your prompt.

## 3. Supporting Tools

Other sections give you ways to customize or expand the refined prompt: - Template: A quick intake form for collecting needed details. - Rubric: A scoring guide for comparing options. - Mapping: If-then rules to adapt outputs. - Artifacts: Examples, prompt skeletons, or stubs. - Variants: Executive vs. Technical versions for different audiences.

## 4. Governance & Risk Notes

Always review these. They flag compliance, privacy, and responsible use issues.

## 5. Next Steps

The final section helps you test, adapt, and iterate your refined prompt for better results.
